

Make-Up Liquor Pumps

Make-Up Liquor Pumps need to be a reliable product. Their function, high speed transportation of hot process liquor, exposes the pump to severe abrasion and corrosion conditions.

Tristar rebuilds and manufactures Make-Up Liquor Pumps. Procedures include:

- Issue a detailed condition report, indicating scope of work to return unit to design operating condition.
- Rotating assembly is balanced to operating speed.
- A continuous improvement program to upgrade component materials to extend operating life.

At **Tristar**, a dedicated project engineer follows your Make-Up Liquor Pump throughout the entire process with:

- Quality workmanship
- On budget projects
- On time delivery
- Access to support
- Repeatable and improved results

Tristar also services a variety of low and high pressure feeders, mixers, thick stock pumps and other equipment in your mechanical and chemical pulping fiber lines.

technical information

Equipment Serviced

All welding is to ASME specification.

Metallurgy:

- Austenitic stainless (316L, 317L, 329)
- Duplex stainless (Avesta 2205, Hastalloy Ferralium 255) Alloy 20
- Stellite
- 17.4 PH

Models:

- 2 LRS
- 6 x 8 x 12 HCD
- 6 x 10 x 13 HCD
- 6 x 8 x 12 LCD

Tristar carries a complete spare parts inventory for these model pumps.
